WirelessInfo FIWARE Reference Lab

- The Czech WirelessInfo Living Lab established at the beginning of 2014 the WirelessInfo FIWARE Reference Lab. The main incentive of this reference lab is to intensively test the FIWARE Generic Enablers (FIWARE GEs). The focus of the WirelessInfo FIWARE Reference Lab is on testing and validation of FIWARE GEs and their integration with other existing components.
- The WirelessInfo FIWARE Reference Lab is already hosting two successful projects SmartHoney and Imatop under the SmartAgriFood accelerator (FI-PPP) and one Brownfield4life in SoulFI
- The WirelessInfo FIWARE Reference Lab is supported also from SDI4Apps and FOODIE

WFS download service - ZABAGED®

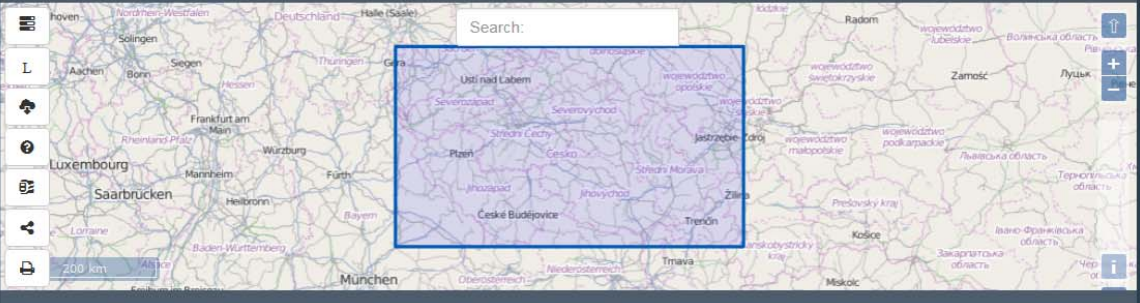

Basic metadata

Abstract
WFS-ZABAGED® is a non-public download service for provision of Fundamental Base of Geographic Data of the Czech Republic (ZABAGED®) data. The service makes possible repetitive downloading of these data from periodically updated publication database in GML format (2.1.2, 3.0.0 and 3.1.1) to registered users. The service fulfils the OGC WFS 1.1.0 standard.
